**VISION PLAN VS. MEDICAL INSURANCE POLICY:**

**(Davis Vision, VSP or Eyemed)**

Davis Vision, VSP and EyeMed are limited optical benefits. They are **NOT** medical insurance plan.

Your vision plan coverage provides for an optical and contact lens benefit. It also includes a limited eye examination of the *normal eye*. It does **NOT** provide for discussion, treatment or additional testing of any ocular pathology (abnormal findings).

All examinations at Advanced Eye Care Center, P.A. are performed by a Medical Doctor (M.D.), Board-Certified in Ophthalmology (Medicine and Surgery of the Eye). A comprehensive evaluation will be performed.

If you are having eye related symptoms (for example: redness, eye irritation, tearing, headache or blurred vision not correctable by glasses) or an *abnormal finding is uncovered during the course of your examination* (you may not be aware of such findings), your eye examination and additional testing, if performed, will be billed to your major medical plan. Your vision benefit may be applied to the cost of the refraction (measurement to determine a change in prescription), a service which may not be covered by your medical insurance. Your medical plan may require you to pay a copayment and coinsurance depending on the plan.

Your benefit towards eyeglass and contact lens will be the same regardless of the presence of ocular pathology.

I authorize Advanced Eye Care Center to bill my medical insurer if my eye examination reveals any eye abnormality or disease. I understand that I will be responsible for any copayment or coinsurance as required by my medical insurance company.

## OFFICE POLICIES REGARDING INSURANCE PLANS AND REFERRALS

We understand that many changes in the healthcare systems have made it quite confusing for our patients. The following are guidelines that have been established by the insurance companies to allow for reimbursement for the services we provide.

- **YOU** are responsible for obtaining and bringing referrals **at the time service is rendered**.
- Primary care physicians have indicated that they cannot be called with a patient in the office for a referral for that particular visit. Referrals must be obtained **before** your visit in our office. Primary care physicians often need several days to provide you with the referral.
- Referrals **do** expire; most are good for either sixty or ninety days. This is clearly indicated on referral forms.
- **If a referral is required and not obtained by the patient and the claim is denied, you are fully responsible for payment.**
- You are responsible for your co-payment at the time treatment is rendered.
- **In addition to your co-pay there is a charge for a refraction. A refraction is a check for eyeglass prescription. Many insurances consider this to be a "non-covered" service. You will be responsible for the $50.00 fee if your insurance company denies it.**
- A consultation report will be sent to your Primary care doctor after the first visit and follow-up reports will be provided as necessary.
- We are always available to help you with any questions regarding your treatment in our office. If you have a specific question regarding your insurance, please contact them directly. The number is located on the back of your insurance card.

I have read and understand the above,
